Profile

Seeking a role in a dynamic organization to apply software development and database management skills for business growth. Eager to enhance technical expertise and stay updated with emerging technologies. Completed training at Codegnan to strengthen technical proficiency.

SKILLS

- **Languages** Python, c
- **Databases** SQL
- **Web Development** HTML, CSS, JavaScript, React

CERTIFICATIONS

- Python For Data Science – **NPTEL [IIT -MADRAS]**
- The Joy of Computing Using Python - **NPTEL [IIT -MADRAS]**
- Data Visualization Using Power-bi& Tableau – **Naresh it technologies**
- Python Basic Certification - **Hacker rank**

Projects

Movie Search App using React: [GitHub link](#) [live link](#)

Built a responsive Movie Search App Using React, integrating the OMDb API to fetch and display movie details such as posters, titles, and release years. Implemented real-time search functionality with dynamic UI updates, focusing on clean design, component reusability, and seamless API integration to enhance user experience.

Criminal Face Identification and Detection System: [Link](#)

Designed and implemented an automated Criminal Face Identification system using deep learning and computer vision techniques. The system processes facial images from CCTV or sketches and segments them into features like eyes, nose, and lips for analysis. Preprocessing involved MTCNN for face detection and FaceNet for feature extraction, followed by classification using HOG-SVM and HOG-KNN models. Evaluation metrics like accuracy, precision, recall, and F1-score were used to assess performance. Delivered a user-friendly interface for law enforcement to identify suspects efficiently from visual inputs.

ATM Console-Based System : [Link](#)

Developed a Python-based console ATM system with features like account creation, PIN management, and transaction tracking. Integrated secure OTP verification via Gmail SMTP for PIN-less login and authentication. Enabled OTP-based PIN generation/reset, enhancing security for banking operations. Designed a command-line interface with real-time input validation and email communication. Strengthened skills in Python, SMTP protocol, and secure user authentication systems

Console Based University Management System Using Python [OOPS and Files] : [Link](#)

Developed a University Management System in Python using object-oriented programming and file handling to manage colleges, students, and teachers. The system supports basic CRUD operations, with data persistently stored in a .txt file acting as a lightweight database. Real-world entities like students and teachers are modelled using class inheritance, while a dictionary-based structure manages relationships between colleges and individuals. A command-line interface enables dynamic interaction for adding, displaying, and searching records. Data is loaded from and saved to database.txt, ensuring consistent session management and persistence.

Education

- **B.Tech in CSE - Ai&ML** (2021 – 2025) *Narasaraopet Institute of Technology* | **GPA:** 8.2/10
- **Intermediate in science** (2019 – 2021) *Modern Junior College* | **Percentage:** 92%
- **10th Class** (2018 – 2019) *Modern High School* | **GPA:** 9.7/10

LANGUAGES

- Telugu
- English

HOBBIES AND INTERESTS:

- Travelling
- Cooking
- Badminton

Declaration

I declare that the information in this resume is true and accurate to the best of my knowledge.
